

Full customer service

From R&D to industrial production

ISOICHEM provides a «comprehensive» service that ranges from development to production, through an offer based on expertise, know-how and a «technology platform» enabling customer control at all steps of the process.

A comprehensive offer

ISOICHEM services rely on interested project management:

- committing on a commercial offer which includes a detailed description of the proposed technical development, project phases with reviews and preliminary estimates of the production costs,
- offering regular project review meetings and complete transparency at every step of the project,
- making 100% of project-related information available to the customer via quality-controlled documentation, in compliance with the customer's documentation standards,
- providing the best possible response to the recurring three-fold demand including technical requirements, economic performance and material deadlines.

With its reputation as an industrial chemist with a high-standard customer service, ISOICHEM focuses on two key drivers for the success of its customer project:

- continuous development of its technology platform based on the implementation of new chemical synthesis and engineering solutions,
- full integration of current regulations such as REACH and CMR in our process development strategy.

"THE KEY SOLUTION PROVIDER"

ISOICHEM: your key solution provider

ISOICHEM designs creative and accurate solutions for its customers at any step of a pharmaceutical product development and production.

ASSETS

35 years of experience

Technology platform:

- hydrogenation pressure 40 bars,
- phosgenation, hydrazines...

Advanced organic chemistry,

Management of complex projects,

Quality and safety culture,

Capability to find creative solutions,

Confidentiality, transparency and customer intimacy.

FACILITIES

R&D laboratory,

Analytic development,

Process safety laboratory,

Process engineering,

Polyvalent cGMP pilot plant,

cGMP production units over 270 m³ of reactors.

OTHER SERVICES

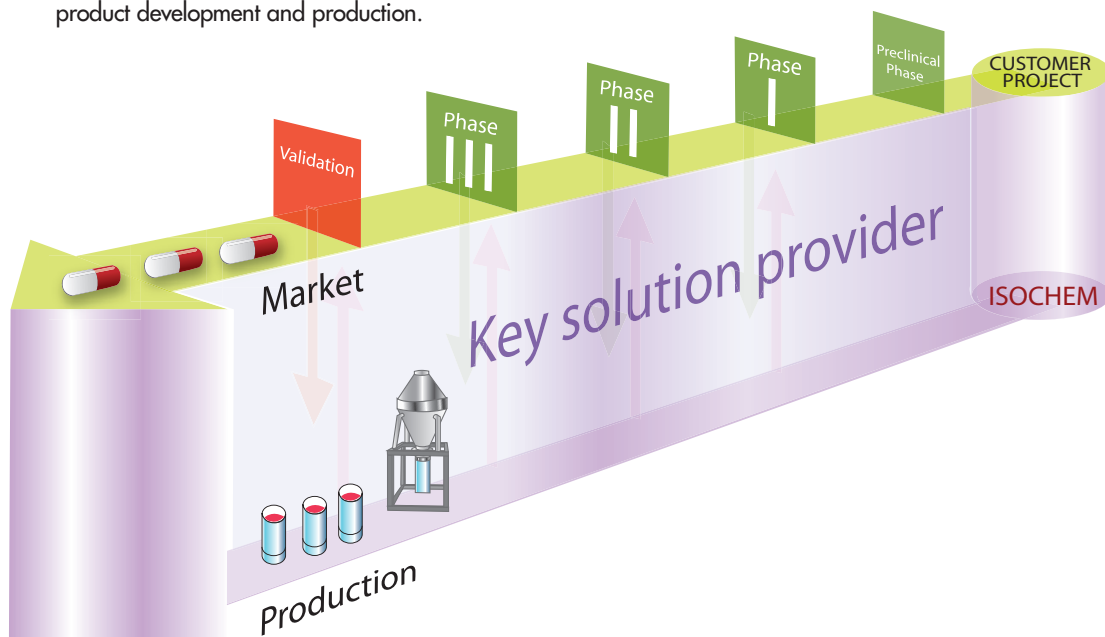

QA (ICH compliance, DMF),

HSE (REACH support),

Confidentiality and IP

management,

Project management.

PROJECT EVALUATION

- identification:
 - of critical points
 - of key technologies and required skills
- regulation diagnostic
- forecasting economic evaluation

COMPREHENSIVE SERVICE OFFER

- prerequisites - hypotheses
- technical programme
- regulation support (DMF, REACH)
- project management
- transparency - communication
- detailed planning

KICK OFF MEETING

- validation of input data and objective

RELIABILITY AND TRANSPARENCY

- project team leader
- regular reporting
- project reviews
- creative process
- analytic support
- tailor-made documentation
- timely supplies (product and reports)
- confidentiality
- controlled lead times and costs

RELIABLE PRODUCTION

- FDA and customer audit satisfaction
- best HSE standards
